## Riesling

*Riesling can be dynamic, and ranges from dry to sweet with a crisp lightness that bodes well for easy drinking. Often there will be an easily detectable peach and mineral complex. Riesling is a very versatile wine to have with food, because of its balance of sugar and notable acidity. It can pair with white fish, or with pork, and it is one of the few wines that can stand up to spicy foods. Riesling's typical aromas are of flowers, tropical fruits, and mineral stone. The sharp acidity/sweetness in Rieslings can serve as a very good balance to foods that are high in salt content.*

## Gewürztraminer

*Gewürztraminer is known for its spicy characteristics. The name literally means "Spice Traminer", and the characteristic of the wine, rather than any specific spice, is that there is a strong smell of lychees on the bouquet. This characteristic aroma means that Gewürztraminer is classified as an aromatic wine grape. Dry Gewürztraminer may also have aromas of roses, passion fruit and floral notes.*

Trimbach Gewürztraminer 2006	Alsace, France	45
Ventana Gewürztraminer 2008	Monterey	30

## Viognier

*Viognier wines are well-known for their floral and fruity aromas. It has the most amazing clear, golden color and the aroma of flowers and fruits at their freshest. Many talk of being surprised by the taste; the color and nose hinting at something sweeter but the actually taste being dry with a variety of nuances both on the tongue and afterwards.*

## Chardonnay

*Easily, the most popular white grape today. Its wines include many from California and France. Chardonnay offers fruity aromas and flavors, and because of its compatibility, it is most often fermented in oak. It has medium to high acidity and is rich and full bodied. Without oak, Chardonnay generally produces a soft wine, often with fruity flavors. When aged with oak, Chardonnay can acquire a smoky, vanilla, caramel, or buttery aroma.*

## Rosé

*A true vin rosé is by no means a blend of red and white wines, but a special product, (usually made from red grapes alone) and owing its color to the fact that it was neither fermented entirely with grape skins (like all red wines), nor entirely without (like all white wines). Rosés are produced in almost all wine-growing countries, and they should be served chilled and drunk young.*

Curtis Heritage Rosé 2007	Paso Robles	28
Eberle Winery Syrah Rosé 2005	Paso Robles	27

## Pinot Noir

*A light colored red wine with higher acidity, and medium tannin. Joel Fleischman of Vanity Fair describes Pinot Noir as "the most romantic of wines, with so voluptuous a perfume, so sweet an edge, and so powerful a punch that, like falling in love, they make the blood run hot and the soul wax embarrassingly poetic."*

*An earthy aroma that matches up well with mushrooms, veal, pork, and lamb.*

## Syrah, Shiraz, Petite Sirah and Rhone Blends

*The Syrah/Shiraz grape produces deeply colored wines with full body, strong tannin, and strong aromas that suggest smoked meat or even burnt rubber. Syrah is from Rhone Valley of France, but has become popular in California and Australia where is called Shiraz. Petite Sirah, also called Durif, is a tannic wine with a spicy, plumy flavor.*

## Cabernet Sauvignon and Bordeaux Blends

*Cabernet Sauvignon wines are generally full-flavored, with a smooth and lingering "finish". Cabernet Sauvignon has a well defined aroma that is characterized by a smell of violets, blackcurrant, cedar and spice, with accents of chocolate, ripe, jammy berries, oak, pepper and earth, and even hints of eucalyptus and green pepper. Full flavors of cassis, black cherry and red berry are also prevalent. The French have been blending wines for centuries. California and Washington are attempting the same: after all, the art of winemaking is really the art of blending. Cabernet Sauvignon, Cabernet Franc, Malbec, Merlot, and Petit Verdot are grapes used in these blends.*

## Italian Reds

*Italy claims more grape varieties than any other country: 350 have been codified and more than 1,000 others are being catalogued and studied. This extraordinary range of grapes and wine styles means that Italy's potential as a source for diverse and distinguished wines has barely been tapped and is little understood. All of Italy produces grapes therefore wines. The regions of Piedmont, Tuscany and Veneto produce some of the best and well known Italian wines. The pride of Tuscany is the Sangiovese grape which produces a wine full of cherry fruit, earth and cedar such as Chianti and Brunellos. The Piedmonte region's principal grape is the Nebbiolo which produces an elegant wine with a bouquet of wild mushroom, truffle, roses and tar such as Barolos and Barbarescos. The Veneto region is known for its Corvina grape which produces wines with a dark cherry fruit flavor and spices and a fruit friendly acidity such as Amarone and Valpolicella*
